Foreword

The following list contains the most of the recent creations of merit and some you will recognize as featuring the last New York show. In the entire list I know there is not a variety that is not superior to the average and many are the last word in modern dahlia culture. They are sent out in green plants only, but every plant is guaranteed to form a good tuber or its purchase price will be gladly returned. You will also note that the prices are considerably lower than are quoted by most growers. If you desire any particular variety in quantity I will be pleased to quote you a special price.

As many of these varieties are of very recent introduction and will be in great demand I advise early ordering to insure delivery. Cash is always very acceptable, twenty-five per cent with order balance before delivery. My business reference is the Newton Trust Co., Newton, Mass.

**Pot Roots**

Have you ever considered the superiority of pot-roots over tubers in the new and valuable dahlias? You have probably had the experience of trying to carry over expensive varieties in tubers only to lose them. The same stock in the form of pot roots would certainly carry thru in fine condition. A few good reasons why they are superior to one year tubers:

1. They will keep absolutely, no matter what the variety.
2. They are easier to pack for shipment.
3. They do not take one quarter the space to stow away for winter.
4. No necks exposed to be broken.
5. A great amount of space is saved when planted in bench to make cuttings.
6. They can be purchased cheaper than tubers.
7. Considered in anyway they are far superior to tubers. I have them in all the latest varieties of merit for fall delivery. Let me quote you.
Fall Sale of Field Grown Tubers

Every fall I have made a practice of selling any surplus tubers at greatly reduced prices. This includes every variety which I grow regardless of how valuable they may be. Having a limited amount of room for storage of dahlias it is necessary that I do this. Keep me in mind for these field grown bargains.
